

ADVANTAGES

- Microfine glass media with thermoplastic resin separators formed into a single mini-pleat filter pack.
- 95% at 0.3µ to 99.99995% at most penetrating particle size (MPPS).
- Available in 53mm, 70mm or 100mm pack depths.
- Available with gasket, knife-edge, or gel channel for sealing to mounting hardware.

Application	Pharmaceutical and semiconductor manufacturing facilities, medical facilities and other clean process applications
Frame	Anodized aluminium
Gasket	Available on demand
Media	Glass fiber
Separator	Hot-melt Separator Technology
Sealant	Polyurethane
Recommended final pressure drop	2x Initial pressure drop
Max Temperature (°C)	71° C, 160° F
Comment	Tested in accordance with IEST Recommended Practice for Testing HEPA Filters. UL 900.
